Ans. _____

Q6. What do you mean by moderate climate? Name two regions that experience moderate climate.

Ans. _____

India - Climate, Vegetation and Wildlife

Q1. When is the world wildlife week observed every year and why?

Ans. Every year we observe wildlife week in the first week of October, to create awareness of conserving the habitats of the animal kingdom.

Q2. What is natural vegetation?

Ans. The grasses, shrubs and trees, which grow on their own without interference or help from human beings, are called natural vegetation.

Q3. Why the temperatures are quite low in northern India in winter season?

Ans. During the winter season, the sun rays do not fall directly in the region. As a result the temperatures are quite low in northern India.

Q4. Why the temperatures are quite high in summer season?

Ans. Temperatures are quite high in summer season because in the hot weather season sun rays more or less directly fall in the region.

Q5. Name some birds which migrate to our country in the winter season every year.

Ans. Some birds such as the Pelican, Siberian Crane, Stork, Flamingo, Pintail Duck and Curlew migrate to our country in the winter season every year.

Q6. What do you mean by moderate climate? Name two regions that experience moderate climate.

Ans. Moderate climate means the climate which is neither too hot nor too cold. Coastal places like Mumbai and Kolkata experience moderate climate.
