Ans. ____________________________________________________________
    ____________________________________________________________
    ____________________________________________________________

Q6. Write the following fibres as natural or synthetic: wool, nylon, cotton, silk, polyester, jute, linen, coir, and acrylic.
Ans. ____________________________________________________________
    ____________________________________________________________
Fibre to Fabric

Q1. What type of climate is needed to grow jute?
Ans. Warm and humid climate is needed to grow jute.

Q2. Why cotton fabrics are preferred for mopping in the household cleaning?
Ans. Cotton fabrics can soak water and are coarse and rough. Thus they clean the floor very well.

Q3. Write two method of knitting.
Ans. i. by hands
   ii. by machines.

Q4. What will happen if we pull the yarn from torn pair of socks? State the reason.
Ans. A single yarn gets pulled out continuously as the fabric gets unraveled. This happen because they are made of knitted fabric.

Q5. Why we spin the fibres in order to make yarn?
Ans. Fibres are very thin and weak. We twist them together to make them strong, thick and long.

Q6. Write the following fibres as natural or synthetic: wool, nylon, cotton, silk, polyester, jute, linen, coir, and acrylic.
Ans. Natural fibres: cotton, silk, jute, linen, coir.
   Synthetic fibres: nylon, polyester, acrylic.
