## Fibre to Fabric

Q1. Can we use synthetic fibre for making kitchen towel?

Ans. No, we cannot use synthetic fibre for making kitchen towel because synthetic fibres melt on heating.

Q2. How did people cover their bodies before clothes were invented?

Ans. People use to cover their bodies before clothes were invented by using fur, leather, leaves and grasses.

Q3. Why cotton clothes are normally preferred in India?

Ans. The climate of India is hot and humid. Cotton clothes absorb sweat easily. Hence, people in India prefer to wear cotton clothes.

Q4. Why synthetic clothes are normally not preferred in hot and humid climate?

Ans. Synthetic fibers such as nylon and polyester do not absorb sweat. Hence, synthetic clothes are normally not preferred in hot and humid climate.
