Q1. How do plants reproduce?

Ans. _____

Q2. How are trees adapted to the conditions prevailing in mountain region?

Ans. _____

Q3. What is respiration?

Ans. _____

Q4. Write a note on terrestrial habitats.

Ans. _____

Q5. Write a short note on aquatic habitats.

Ans. _____

The Living Organisms and Their surroundings

Q1. How do plants reproduce?

Ans. Most of the plants reproduce through the seeds. Seeds are sown in the soil which on germination grows into new plants. Some plants can reproduce through their stems, roots, leaves or cuttings.

Q2. How are trees adapted to the conditions prevailing in mountain region?

Ans. Trees in mountain regions are normally cone shaped and have sloping branches. The leaves of some of these trees are needle-like. This helps the rainwater and snow to slide off easily.

Q3. What is respiration?

Ans. Breathing is part of a process called respiration. In respiration, some of the oxygen of the air we breathe in is used by the living body. We breathe out the carbon dioxide produced in this process.

Q4. Write a note on terrestrial habitats.

Ans. The habitats of plants and animals that live on land are terrestrial habitats. Some examples of terrestrial habitats are forests, grasslands, deserts, coastal and mountain regions.

Q5. Write a short note on aquatic habitats.

Ans. The habitats of plants and animals that live in water are called aquatic habitats. Ponds, swamps, lakes, rivers and oceans are some examples of aquatic habitats.
