Q1. What is environment?

Ans. _____

Q2. Why is our environment changing?

Ans. _____

Q3. What is biosphere?

Ans. _____

Q4. What is an ecosystem?

Ans. _____

Q5. Plants and animals depend on each other. Give reason.

Ans. _____

Environment

Q1. What is environment?

Ans. The place, people, things and nature that surround any living organism is called environment. It is a combination of natural and human made phenomena.

Q2. Why is our environment changing?

Ans. Our environment is changing because our needs are increasing day by day and in order to fulfill these needs we are modifying and at times even destroying our natural surroundings.

Q3. What is biosphere?

Ans. Biosphere is a narrow zone of the earth where land, water and air interact with each other to support life. Thus, plant and animal kingdom together make biosphere or the living world.

Q4. What is an ecosystem?

Ans. It is a system formed by the interaction of all living organisms with each other and with the physical and chemical factors of the environment in which they live, all linked by transfer of energy and material.

Q5. Plants and animals depend on each other. Give reason.

Ans. Plants provide shelter for animals and they provide oxygen for the animals to live. When animals die they decompose and become natural fertilizer for plants. Animals also help in pollination and seed dispersal.
