Natural Vegetation and Wild Life

Q1. What are the two types of grasslands?

Ans. _____

Q2. What do you know about anaconda?

Ans. _____

Q3. Name some hardwood trees that are commonly found in tropical deciduous forest.

Ans. _____

Q4. What is special about Mediterranean trees?

Ans. _____

Q5. Why the type and thickness of vegetation changes from place to place?

Ans. _____

Natural Vegetation and Wild Life

Q1. What are the two types of grasslands?

Ans. There are two main divisions of grasslands: (1) tropical grasslands, and (2) temperate grasslands.

Q2. What do you know about anaconda?

Ans. Anaconda, one of the world's largest snakes is found in the tropical rainforest. It can kill and eat a large animal such as a crocodile.

Q3. Name some hardwood trees that are commonly found in tropical deciduous forest.

Ans. Hardwood trees that are commonly found in tropical deciduous forest are rosewood, ebony and mahogany.

Q4. What is special about Mediterranean trees?

Ans. Mediterranean trees adapt themselves to dry summers with the help of their thick barks and wax coated leaves which help them reduce transpiration.

Q5. Why the type and thickness of vegetation changes from place to place?

Ans. The type and thickness of natural vegetation varies from place to place because of the variation in factors such as temperature, moisture, slope and thickness of soil.
