Ans. _____

Human Environment Interactions - The Tropical and the Subtropical Region

Q1. Name the tributaries of river Ganga.

Ans. The tributaries of the River Ganga are the Ghaghra, the Son, the Chambal, the Gandak, the Kosi.

Q2. What are bromeliads?

Ans. Bromeliads are special plants that store water in their leaves. Animals like frogs use these pockets of water for laying their eggs.

Q3. Why sunlight does not reach the ground in rainforest?

Ans. The forests are so thick that the dense "roof" created by leaves and branches does not allow the sunlight to reach the ground.

Q4. What are the crops grown by the people of the Amazon Basin?

Ans. They mainly grow tapioca, pineapple and sweet potato. Cash crops like coffee, maize and cocoa are also grown.

Q5. Name the birds that you are likely to find in the rainforests of the Amazon.

Ans. In the rainforests of the Amazon we are likely to find birds such as toucans, humming birds and bird of paradise.

Q6. What are the major cities located on the River Ganga?

Ans. The cities of Allahabad, Kanpur, Varanasi, Lucknow, Patna and Kolkata are located along the River Ganga.
