## Garbage in, Garbage out

Q1. What is papier-mâché?

Ans. Papier-mâché is a paste made of clay and waste paper used for moulding box, trays, basket etc.

Q2. List a few things we use that are made of plastics?

Ans. Toys, shoes, bags, pens, combs, tooth brushes, buckets, bottles, water pipes etc.

Q3. What are the uses of green colored bins?

Ans. The green bins are for collecting kitchen and other plant or animal wastes.

Q4. When rotting of garbage is said to be completed?

Ans. A black color and no foul smell indicate that rotting of garbage is complete.

Q5. For what purpose blue colored bins are used?

Ans. The blue bins are used for materials that can be used again — such as plastics, metals and glass.

Q6. What is composting?

Ans. The rotting and conversion of some materials into manure is called 'composting'.

Q7. What is a landfill?

Ans. Landfill is an area where the garbage collected from a city or town is dumped. The area is later converted into a park.

Q8. Why banana leaf platter is a better option than plastic plate?

Ans. Banana leaf platter is a better option than plastic plate because it is cost effective and eco-friendly.
