Weather, Climate and Adaptations of Animals to Climate

Q1. The tropical rainforest has a large population of animals. Explain why it is so?

Ans. _____

Q2. When are the maximum and minimum temperatures likely to occur during the day?

Ans. _____

Q3. Why do toucans have big beaks, and what purpose does it serve?

Ans. _____

Q4. What do you understand by the term weather?

Ans. _____

Q5. Name some countries where the tropical rainforests are found.

Ans. _____

Weather, Climate and Adaptations of Animals to Climate

Q1. The tropical rainforest has a large population of animals. Explain why it is so?

Ans. Hot and humid climate supports an enormous number and a variety of animals in rainforest.

Q2. When are the maximum and minimum temperatures likely to occur during the day?

Ans. The maximum temperature of the day occurs generally in the afternoon while the minimum temperature occurs in the early morning.

Q3. Why do toucans have big beaks, and what purpose does it serve?

Ans. Bird Toucan possesses a long, large beak. This helps a toucan to reach the fruits on branches which are otherwise too weak to support its weight.

Q4. What do you understand by the term weather?

Ans. The day-to-day condition of the atmosphere at a place with respect to the temperature, humidity, rainfall, wind-speed, etc., is called the weather at that place.

Q5. Name some countries where the tropical rainforests are found.

Ans. Examples of some countries where the tropical rainforests are found are India, Malaysia, Indonesia, Brazil, Republic of Congo, Kenya, Uganda, and Nigeria.
