## Weather, Climate and Adaptations of Animals to Climate

Q1. What kind of information does a weather report carry?

Ans. The daily weather report carries information about the temperature, humidity and rainfall during the past 24 hours. It also predicts the weather for the day.

Q2. Name some well-known countries that belong to the Polar Regions.

Ans. Some well-known countries that belong to the Polar Regions are Canada, Greenland, Iceland, Norway, Sweden, Finland, Alaska in U.S.A. and Siberian region of Russia.

Q3. What do Meteorological Department of the Government do?

Ans. The weather reports are prepared by the Meteorological Department of the Government. This department collects data on temperature, wind, etc., and makes the weather prediction.

Q4. What is a rain gauge?

Ans. Rain gauge is an instrument used to measure the amount of rainfall over a set period of time. It is basically a measuring cylinder with a funnel on top to collect rainwater.

Q5. Write some of the adaptations of animals found in tropical rainforest.

Ans. Some adaptations of animals living in the tropical rainforests include living on the trees, development of strong tails, long and large beaks, bright colours, sharp patterns, loud voice, diet of fruits, sensitive hearing, sharp eyesight, thick skin, ability to camouflage in order to protect themselves from predators, etc.
