## Water-A Precious Resource

Q1. Why do we celebrate world water day?

Ans. We celebrate water day every year to attract the attention of everybody towards the importance of conserving water.

Q2. What is aquifer?

Ans. At places the groundwater is stored between layers of hard rock below the water table. This is known as an aquifer.

Q3. What are the main processes involved in the water cycle?

Ans. The main processes involved in the water cycle are evaporation, transpiration, condensation, precipitation, runoff, and percolation.

Q4. Why is the water cycle important?

Ans. The water cycle is important because its process provides Earth with the natural, continual water supply all living things need in order to survive.

Q5. What is the source of groundwater?

Ans. The rainwater and water from other sources such as rivers and ponds seeps through the soil and fills the empty spaces and cracks deep below the ground.

Q6. How is water supplied in town?

Ans. Most towns and cities have water supply system maintained by the civic bodies. The water is drawn from nearby lakes, rivers, ponds or wells. The water is supplied through a network of pipes.
