## Agriculture

Q1. What are secondary activities?

Ans. Secondary activities are concerned with the processing of natural resources. Example: manufacturing of steel, baking of bread and weaving of cloth etc.

Q2. What are the climatic conditions required for growing cotton?

Ans. Cotton requires high temperature, light rainfall, two hundred and ten frost-free days and bright sunshine for its growth. It grows best on black and alluvial soils.

Q3. What weather conditions are required for wheat?

Ans. Wheat requires moderate temperature and rainfall during growing season and bright sunshine at the time of harvest. It thrives best in well drained loamy soil.

Q4. When does food security exist?

Ans. Food security exists when all people, at all times, have access to sufficient, safe and nutritious food to meet their dietary needs and food preferences for an active and healthy life.

Q5. Where is shifting cultivation practised?

Ans. Shifting cultivation is practised in the thickly forested areas of Amazon basin, tropical Africa, parts of southeast Asia and Northeast India. These are the areas of heavy rainfall and quick regeneration of vegetation.
