sparsely, favourable, fallow, artificial, fertile, natural, extreme, densely
When people are attracted to an area it becomes
Populated. Factors that influence this include climate;
good supplies of resources and land.

Ans. _____

Q2. What is meant by population composition?

Ans. _____

Q3. Why did world population rise from 1800 onwards?

Ans. _____

Human Resources

Q1. Complete the sentences below using some of the following words.
sparsely, favourable, fallow, artificial, fertile, natural, extreme, densely
When people are attracted to an area it becomes
Populated. Factors that influence this include climate;
good supplies of resources and land.

Ans. When people are attracted to an area it becomes densely populated.
Factors that influence this include favourable climate; good supplies of
natural resources and fertile land.

Q2. What is meant by population composition?

Ans. Population composition refers to the structure of the population.

The composition of population helps us to know how many are males or
females, which age group they belong to, how educated they are and
what type of occupations they are employed in, what their income levels
and health conditions are.

Q3. Why did world population rise from 1800 onwards?

Ans. In 1820, the world's population reached one billion. A hundred and fifty
years later, in the early 1970s, the world's population reached 3 billion.
This is often called population explosion. In 1999, less than 30 years
later, the population doubled to 6 billion. The main reason for this growth
was that with better food supplies and medicine, deaths were reducing,
while the number of births still remained fairly high.
