## Conservation of Plants and Animals

Q1. What gas do plants use in photosynthesis?

Ans. Plants need carbon dioxide for photosynthesis.

Q2. Name two national parks.

Ans. Corbett National Park (Uttarakhand) and Gir National Park (Gujarat)

Q3. What is 'species'?

Ans. Species is a group of populations which are capable of interbreeding.

Q4. Name the first Reserve Forest of India.

Ans. Satpura National Park is the first Reserve Forest of India.

Q5. What is Biosphere?

Ans. Biosphere is that part of the earth in which living organisms exist or which supports life.

Q6. What is deforestation?

Ans. Deforestation means clearing of forests and using that land for other purposes.

Q7. What can be done to retain our 'green wealth' for generations?

Ans. If we have to retain our green wealth for generations, plantation of more trees is the only option.

Q8. What is Red Data Book?

Ans. Red Data Book is the source book which keeps a record of all the endangered animals and plants.
