Ans. _____

Q4. What is the role of biosphere reserves?

Ans. _____

Q5. What are the protected areas which have been earmarked to protect our flora and fauna and their habitats?

Ans. _____

Q6. What is ecosystem?

Ans. _____

Conservation of Plants and Animals

Q1. What do the rock paintings found in the rock Shelters of Satpura National Park depict?

Ans. Figures of animals and men fighting, hunting, dancing, and playing musical instruments are depicted in these paintings.

Q2. Protected forests are also not completely safe for wild animals. Why?

Ans. Protected forests are also not completely safe for wild animals because people living in the neighbourhood encroach upon them and destroy them.

Q3. Some tribals depend on the jungle. How?

Ans. The forests provide food, fodder and other resources to the tribal people. Hence, they depend on forest for their daily requirements.

Q4. What is the role of biosphere reserves?

Ans. The biosphere reserves help to maintain the biodiversity and culture of that area. A biosphere reserve may also contain other protected areas in it.

Q5. What are the protected areas which have been earmarked to protect our flora and fauna and their habitats?

Ans. To protect our flora and fauna and their habitats, protected areas called sanctuaries, national parks and biosphere reserves have been earmarked.

Q6. What is ecosystem?

Ans. An ecosystem is made of all the plants, animals and microorganisms in an area along with non-living components such as climate, soil, river deltas, etc.
