## Conservation of Plants and Animals

Q1. What are the advantages of reforestation?

Ans. Benefits of reforestation

- i. Help to maintain Oxygen Carbon dioxide balance.
- ii. Prevents soil erosion and floods.
- iii. Maintain water cycle.
- iv. Helps maintain the temperature in the local environment.
- v. Increase rainfall in an area.
- vi. Produces a large quantity of raw materials for industry such as paper industry, timber trade etc.
- vii. Increases the area of earth under forests which is good for the conservation of wildlife.
- viii. Combat climate change.

Q2. What are the various measures which can be taken to conserve forest and wildlife?

Ans. Steps

1. Some of the laws should be made to ban the killing or capturing of endangered animals or birds. It should be made a punishable offense.
2. The more number of National Parks and Sanctuaries should be established for preserving the natural habitats of wild animals and birds throughout the country.
3. Special attention should be paid even by us also to the conservation of endangered species of wild animals and birds to prevent their extinction altogether.
4. The unauthorized cutting of forest trees for timber and wood for fuel should be stopped immediately.
5. In case of the authorization of the Government for felling of trees, then the equal area of land should be planted with sapling of trees to make up for the loss in the long run.
