## Public Facilities

Q1. What do you mean by universal access to water?

Ans. Universal access to water means that it is the right of every person, whether rich or poor, to have sufficient amounts of water to fulfil his/her daily needs at a price that he/she can afford.

Q2. Why do you think there are so few cases of private water supply in the world?

Ans. Water is a basic necessity for all. Hence, a private company cannot be in a position to supply water at a rate which is affordable to all people. Due to this, there are very few cases of private water supply in the world.

Q3. What is sanitation?

Ans. Sanitation refers to the provision of facilities for the safe disposal of human urine and faeces. This is done by construction of toilets and pipes to carry the sewerage and treatment of waste water. This is necessary so as to avoid contamination.

Q4. Describe Right to water.

Ans. The Constitution of India recognises the right to water as being a part of the Right to Life under Article 21. This means that it is the right of every person, whether rich or poor, to have sufficient amounts of water to fulfil his/her daily needs at a price that he/she can afford.
