Q1. Private educational institutions – schools, colleges, universities, technical and vocational training institutes are coming up in our country in a big way. On the other hand, educational institutes run by the government are becoming relatively less important. What do you think would be the impact of this? Discuss.

Ans. Private educational institutions- schools, colleges, universities, technical and vocational training institutes are coming up in our country in a big way. On the other hand, educational institutes run by the government are becoming relatively less important. This will have a multifarious impact on India, in the long run. Private institutions levy very high fees, which only affluent people can afford. So the quality education can be availed by only rich people. If educational institutions run by government are not up to the mark, the weaker sections of the society are deprived of quality education.

If people stop using educational facilities provided by the government, the latter will soon become redundant. Poor people cannot afford to educate their children in private institutions; consequently, this trend will only serve to heighten the gap between the rich and the poor.
