Q5. What led to the development of grasslands?

Ans. _____

On The Trail of the Earliest People

Q1. Where Ostrich egg shells were found in India in the Palaeolithic Age?

Ans. Ostriches were found in India during the Palaeolithic period. Large quantities of ostrich egg shells were found at Patne in Maharashtra.

Q2. Collecting plant produce needs lot precautions. Why?

Ans. To collect plant produce, you need to find out which plants or parts of plants are edible, that is, can be eaten, as many can be poisonous.

Q3. Find out the states where Bhimbetka, Hunsgi and Kurnool are located?

Ans. Bhimbetka – Madhya Pradesh

Hunsgi - Karnataka

Kurnool – Andhra Pradesh

Q4. Traces of ash have been found in Kurnool caves. What it suggests?

Ans. Traces of ash have been found here. This suggests that people were familiar with the use of fire. Fire could have been used for many things: as a source of light, to cook meat, and to scare away animals.

Q5. What led to the development of grasslands?

Ans. Around 12,000 years ago there were major changes in the climate of the world, with a shift to relatively warm conditions. In many areas, this led to the development of grasslands.
