Q4. Write one point of difference between perennial and seasonal rivers?

Ans.

<b>Perennial rivers</b>	<b>Seasonal rivers</b>

## On The Trail of the Earliest People

Q1. What do you understand by sites?

Ans. Sites are places where the remains of things (tools, pots, buildings etc.) were found. These may be found on the surface of the earth, buried under the earth, or sometimes even under water.

Q2. List three ways in which hunter-gatherers used fire. Would you use fire for any of these purposes today?

Ans. Fire could have been used for many things: as a source of light, to cook meat, and to scare away animals.

Today, we use fire for cooking food and to keep ourselves warm.

Q3. Many paintings show hunting scenes in which the animals are shown struck with arrows and spears. Why do you think early men made such paintings?

Ans. It is possible that these paintings were done on ceremonial occasions. Or perhaps they were made for special rituals, performed by hunters before they went in search of prey.

Q4. Write one point of difference between perennial and seasonal rivers?

Ans.

<b>Perennial rivers</b>	<b>Seasonal rivers</b>
Many rivers and lakes that have water throughout the year are called Perennial rivers.	Many rivers have water during particular season i.e. rainy season are called Seasonal rivers.
